

# B-4L

Magnetic contacts are basic elements of a perimeter protection system. Large **B-4L** tight magnetic contacts in a metal housing are designed for surface mounting. The metal screen protects the wiring against damage, which makes these contacts a perfect solution for locations particularly vulnerable to sabotage attempts or mechanical exposure. These contacts are screwed to a surface and provide an ideal solution for garage gate installation.

- surface mounted (screw mount)
- rugged, metal sealed body
- armored cable

Max. reed switched voltage	100
Max. switched current	0,4
Operating temperature range	-10...+55 °C
Weight	262
Maximum humidity	93±3%
Make distance	75
Break distance	80
Dimensions magnet enclosure	78,5 x 29 x 54,5
Environmental class according to EN50130-5	II
Detector type (outside magnetic field)	NO
Reed switch enclosure dimensions	104,5 x 44,5 x 11,5
