

BR-STD-3

BR-STD-3 is a passive 125 kHz transponder. It works with proximity card readers, therefore it can be used for contactless authorization in the alarm systems based on **INTEGRA**, **INTEGRA Plus** and **VERSA** control panels, as well as in the **ACCO NET** and **ACCO** access control systems. The device comes in the form of a stylish key tag made of black synthetic leather. It is provided with a hook for easy attachment to keys, lanyard, etc.

- 125 kHz passive transponder
- aesthetic appearance
- color: black
